

ENERGY CORRIDOR DISTRICT

June 06, 2014

Mr. Robert L. Rayburn, President
Bayou Preservation Association
P.O. Box 131563
Houston, Texas 77219-1563

Mr. Rayburn,

The Energy Corridor District (District) acknowledges the importance of biotechnical drainage way stabilization and riparian restoration and therefore supports the Memorial Park Demonstration Project (MPDP). The intent of the MPDP to stabilize a section of Buffalo Bayou in Houston, Texas is vitally important, as it will demonstrate a more desirable solution to an already stressed bayou without the use of hard-armored embankments.

The District fully recognizes and further supports the important role that stable, sustainable drainage corridors provide to surrounding properties due in part to erosion and sedimentation control, improved water quality, habitat preservation and an expanded quality of life.

Thank you for this opportunity to share our support.

Respectfully,

David W. Hightower
President
THE ENERGY CORRIDOR DISTRICT
